

Devoir Sirolimus Coated Balloon Catheter

Pre-clinical data

CONTENTS

1. Histological evaluation
2. Pharmacokinetic evaluation

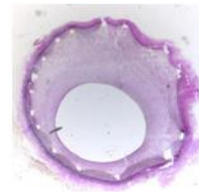

Histological evaluation

Histological Evaluation after 28 days implantation*

BMS + DEVOIR

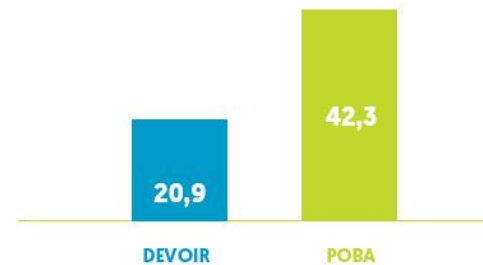

BMS + POBA

Median NIH Obstruction by OCT (%)

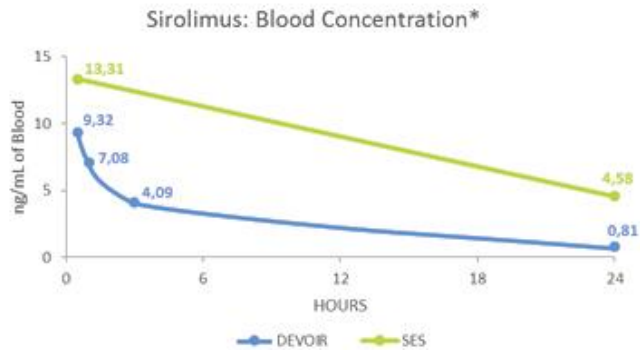

Median NIH Obstruction by Histology (%)

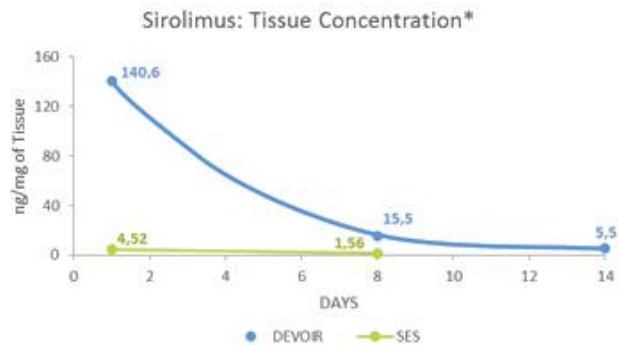

Effective reduction of neo-intimal hyperplasia

* data on file

Pharmacokinetic evaluation*

- Low sirolimus blood levels
- Lower blood levels compared to sirolimus eluting stent (SES)

- Sirolimus retention up to 14 days
- Higher concentration compared to sirolimus eluting stent (SES)
